Mayor Sutro would not consent to any further curtailing of the lease, but it is probable that all objectionable features will be eliminated after further conforcace with Mesers. Spreckels and Preston.

E. F. Preston, altorney for the railway company, said that the directors might throw the thing if some consideration was not shown them in regard to the lease.

"My opinion of this thing in that the directors of the railroad think many cumbersome provisions were introduced in the agreement which would work the forfeiture of the lease should the road to be bonded. As it stands today it would not be a safe business proposition to entrain. There were so many considerations in the amended lease I could not form an opinion of it when asked for one by the harbor commissioners. I had to wait until I got the lease a whole, which I didn't got till just before the board of directors me this alternoon.

"If they want to keep the valley road out of San Francisco they are guing the right way about it. We are not so anxious to build into San Francisco. The only thing settled about the valley road is that it will be built from Stockton to Eakerslield to give competition to preducers of the valley.

"About \$2,500,000 is anisoribed. It will thing from eight to ten militions to initid and, equip the road as fully planted, but is to reach San Francisco will also many to come from?"

Director Sloss, who is a member of the committee appointed to communicate with the barlor commissioners regarding the rejection of the Calma besin lease, declared that the objectionable chances were interiected by disyor Satto and Governor Budd. "As the lease is anow, it is absolutely worthess," the said, because it would prevent the Yalley Road Company from bouting the road, it hampers us on every side, and, of course, as a business proposition, we could do nothing but rutuse to accept it.

the Januares Threalen to Com-Forward and Become Serious Factors in the Government.

SAN FRANCISCO, May 8.—It is proba-ble that the next sixty days will develop some very exciting scones in Ha-wall. Private information recently recaived by Chrence W. Ashford in this city, Indicates that several kinds of trouble are gathering around the gov-ernment of Sanford B. Dole and his col-

leagues.
The Japanese, who are numerous on the islands, and who at present are foverish and clated over the victory of their mother country in the war with Uhlna, threaten to come forward and become serious factors in the government of Hawnii and the adjustment of its affairs. It is known that among the Japanese now on the islands there are severn't hardred trained soldiers—in fact, there are enough of them to solze control of the government at any time, should they so choose. The natives are also recieved by Afr. Ashford, that the basis of operations in the next entbreak will be the island of Mani.

## THE BOND CONTRACT

Thus far the Officials Are Entirely Satisfied.

OBLIGATION COMPLETE TO DATE

io Far as Can Be Learned, Ther Is No Surplus to the Credit. of the Syndicate.

WASHINGTON, May 8 .- Today closed the third month times the boat con-tract with the Morgan-Belmont syndi-cate of New York, and up to this time all of the firm's contracts have been completed to the satisfaction of the ressury officials. On February 8th last, the date of the contract, the your reserve in the treasury muonited to \$42,783,060, which has since been in-creased to \$02,691,679, the amount re-ported tolday, making the net gain for the three months \$48,908,619. Yester-

ported today, making the net gain for the three months \$48,808,519. Yesterday the syndicate deposited in the New York sub-treasury \$819,000, which completes its obligations to date, but does not, so far as can be learned, leave any surprise to their credit. The \$32,900,900 of domestic gold permitted to be deposited under the contract has long since been turned in, but whether all of the \$16,500,000 of forcing gold required to sit 6,000,000 of forcing gold required to sit only the terms of the contract has actually been imported cannot be learned here. It is bolieved, though, that it has not been imported.

It is assumed that the syndicate will be deed on October Is next to lave on deposit the \$32,600,000 in foreign gold, independent of the fact that they may have used domestic gold from time to time and had foreign until the last moment. The treasury officials say that they have no information as to whether the syndicate could meet its contract obligations without buying gold in the west or not, but they are unable to see how the syndicate could meet its contract obligations without buying gold whether on morroan wherever it could. Not the least important feature of their contract, with

but they are imable to see how the syndicate could meet its centract obligations without buying gold whomever and wherever it could. Not the least important feature of their contract with the government is its succement to protect the treasury so far as it was able, from gold withdrawals for export, and at this time with sterling silver at its present high rate is no light obligation, and it is more than probable that the syndicate has been compelled to make heavy purchases of gold in the west, possibly at a slight premium, in order to cover its foreign bills.

That large purchases are making is evidenced by the fact one or more of the large orderies, which heratofree have sold their product at the Denver caseay collice, censed making their delivories there some weeks ago, and the assumption is that it is being sold in New York at figures slightly in advance of the prical at the Denver min. Thus far the officials are entirely satisfied, they say with the manner in which the syndicate its deposits and the control of the markets so as to product the treasury gold from export.

BRITISH SMART MONEY

BRITISH SMART MONEY

THE AMOUNT RAISED BY COPU-TAR DONATIONS.

Central American Republics Likely to Form a Secret Combination Against Great Britain.

MANAGUA, Nicaragua, May 8.—There is no longer any doubt that Great Britain will receive her smart money on time. The 15,000 pounds sterling to be paid by Nicaragua to Great Britain has been raised by popular donations. Three Garman merchants have given about German measure 2000 pounds and the whole amount was be ready in London in a few days. The raising of the money, however, has only increased the teeling in Nicaragna egainst Great Britain, and the feeling is now very bitter indeed, more 30, if possible, than when the British troops indeed at Corinto. The general opinion in that the Central American possible, than when the Dritter according to the third the Gentral American seems to be that the Gentral American republics will form a combination. Possibly secret, against Genta Britain, and that everything possible will be done to exclude British goods from Central America. This feeling will probably result in commercial gain to the United Section.

At the request of the accountry accounting the was sense of the accountry accounting the was expected for one week to enable the executors to consider this opposition. The executors, however, do not concede young Pair's right to content will. The Fair children then objected to the contest commenced by the attorney appointed to represent them into or heirs. Among his ellents he includes Horman Oelrichs, Jr. As Herman Oelrichs has been appointed genoral guardin of his infant son, he desires that his own attorney shall also represent the child. The attorney for the minor heirs argues that the interests of the genoral guardina rea antagonistic to those of his child, whom he contended should be represented. The court took the point under advisement.

to have some important matters of law settled.

If appears that het fall, Warran L. Hill, who was constable at Sanger at that time, made a trip to Mariposa county after J. W. Davis, charged with beating a bound bill. The fees and mileage amounted to about \$200, and this bill was duly lieds with the Board of Supervisors. But they allowed only a part of the bill, leaving \$150 of Hill? claim unpaid. The constable thon assigned the remainder of the claim to W. Il. Thomas of this city and that gentleman brought suit against the county. The case was tried before Junties St. John some time ago and decided in law of Thomas.

### THE LATEST STRIKE.

Twelve hundred workmen at the plant of the Blinois Steel Company, in Olicago, threw down their loals yester-day and went out on a strike. They attempted to compal 400 monthinists contempts the strike of the strike of the plant tempted to compel 400 manhinists em-ployed in the same institution to quit work, and when the latter refused a riot resulted which was ended for the time only after the police had shot over the heads of the mob. Naw the works have been closed, and how much of financial loss and how much of human suffering

been closed, and how much of manacar, loss and how much of human suffering will result time slone can teil.

This strike problem —a phase of the question between capital and labor—has hear diseased from all points of view, and still it presents itself as one of the and still it presents used as one of the overwhelming problems of the day. The Reposition American in the discussing the question generally at this time, but it wishes to call attention to one particular feature of the latest strike, and at the same time offer a few com-

ments thereon.

The dispatch telling of the affair says:
"The strikers for the most part were
Poles and Hungarians." There is nothing new or unprecedented in such a conon. He who has watched the news papers during the last few years knows that in very many instances strikers are largely composed of Poles, Hungarians or some other nationality of ignorant foreigners. We do not mean to suege foreigners. We note these to disclose that conditions would not be hard or that strikes would not occur were there no imported human eathle here, but we do believe that with intelligent American workmen the probability of strikes

can worstmen the recommendation would be minimized.

No sympathy would be due to the Illinois Steel Company although—an improbable ovent—it should lose its plant as the outcome of this strike. If it prefers to keep in its employ untu eed foreigners-who were not improb way imported in violation of the ulien contract law—merely because that sort of labor can be bought at less per day than the American article, it should pay without a murmur the disastrons price which such labor immediate. ably imported in violation of the ulien pry without a number the disastrons price which such labor invariably requires in the end. In the long run the cheapest labor usually is the dearest. The steel company has saved some dollars by employing loreign rather than American labor; now if it lose these same and some added dollars in

those same and some noded colours in contest with the workmon it prefers, no-body need shed tears on its account. This nation has an alien contract law. It may or may not have been violated in the case under consideration, but the evidences that it frequently is but the evidences that it requestly a violated are many. The law should be enforced; if it cannot be we should have another that can. American workmen, accustomed to American ways and fed and clothed in American ways and 180 and clotted in American manner, cannot compete in wages with Poles, Hungarians and that ilk. They and their families cannot live on 35 cents a day and lay away the balance of their six-bite wages; they do not know how, and may the Lord lorbid that they ever shall learn.

Whatever sum the Illinois Steel Company may lose by this strike, it will not be a case for popular sympathy.

### INSTRUCTIVE COMPARISON.

The new triangle in Freeno's municipal government has, stationed at its right angle, and commanding both the other lesser angles, a man who can neither read nor write and whose acquastrature with the principles which govern bonorable conduct between man and man, no less than those which govern benorable conduct between man and man, no less than those which govern men's official relations, is even less than his knowledge of letters, for it is ead ho can write his name.—Expositor. In this kindly mention the Expositor refers to Trustee Spinney, who was re-

refers to Trustee Spinney, who was re-cently elected mayor of the city by the votes of the Democratic members of the Board of Trustees, and who but a few vecks ago was referred to by the Ex sitor in terms of profound respect and ference. Trustee Spinney was about deference. Trustee Spinner was about that time the recipient of many flattering offers of place, power, etc., from the Democratic-Populist combination, in consideration of which he was to turn traitor to the political party with which he has niways affiliated. He declined to accept the honors which his werm but sudden friends had prepared to shower upon him, and in their stead he is now the rechinent, to state it mildly,

ren strenuously proclaimed the blessings which would be borne to the nation on which would be borne to the nation on the white wings of tariff reform. In the interim they have held absolute power for two years, and it is fair to presume that they have reformed the tariff quite to their own satisfaction. The blessings (of a Democratic kind) are visible on every hand, and it is unnecessary to dwell upon them. It will do no herm, however, to select one little blessing out nowder, or select of the many and present it for inspec-tion. The report of the factory inspect-ers for 1804 covers 2888 factories. It shows that there has been a reduction of shows that there has been a reduction of wages (averaging \$1,85 a day) since April 1, 1908, in about one factory out 1; severagended yesterday:

These factories were calculated to give work to 125,018 employes; at the time they were in-spected they employed but 80,375 men, or less than two-thirds of their full caor less than two darks pacity. Evidently the benefits of Dem-ocratic tariff reform are inestimable, in-appreciable and invisible.

### RANDOM REMARKS.

It is said that a postal car has been invented which will carry mail at the rate of 200 miles on hun. That's all right to dream about, but the great, practical want of this coast is a postal car that will carry newspapers at least.

United States Circuit Judge Brown, of New York, has denied the application for a write of removal in the cases exainst C, P. Huntington. He did it on the ground that the "ministreem is fatally defective in not averring that any use was ever made of the pass, or any transportation was ever furnished under it." Now that is countiling like it. It is, indeed, more than prohyble that Mr. Huntington gave the interstate pass to Stone as a little matter of courtesy and with the detinite understanding that it should not be used. Frequently passes are given in this way, there being no intention on anybody's part that they shall ever be used. This is a little peculiarity of the pass extend which beautifully justifies Judge shown in his decision. It is more than likely that Mr. Stone framed the pass and hung it on the wall in his parlor as a delightful memento of his friend. United States Circuit Judge Brown, o

memento of his friend.

It is said that high church dignitaries in England do not wish Oscar Wilde tried again, on account of "the bad influence on the public." The same morbid reasoning might lead them to object to the trial of a netorious nurderer because of the bad influence on the public; Jack hie litiper might go scot free hecause of the bad influence of trying him, and for a precisely similar reason the vilest imaginable of detected criminals might go unscathed. We say that this reasoning is morbid, Who can doubt that punishment should follow the commission of nameless and officus actimes? Shall the outcast who commits them go free because the history of his gailt is repulsive! The idea is repugnant both to common sense and acceptant of the crimes of good government. The welfare of society demands that justice should be meted out to Usear Wilde.

MRS, LEASE AND THINGS. Mrs. Lease says that she has sent tele pathic messages from Kunsas to San Francisco and received accurate answer to them.—Press disputch.

Do you recall the earthquake that, In '92 or '3. In '92 or '3, Phock 'Prisco's houses some, and shat-Tered one or two, maybe? The case is clear; it's very plain: Nature grow slok and wan When Mrs. Lenze's thinkind brain sent one thought husting on.

When Sutro ran to be elect-Ed, to some folks surprise, The people said: "The maxpe Ed's certain to arise." They didn't realize, not then, But now they offens stop.

Edis costant They didn't realize, not such But now they often stop. And say: "Our Mary thought again, and something had to pop."

Consideration of which he was to turn trainer to the political party with which he has always affiliated. He declined to accept the honors which his warm but sudden friends had prepared to shower upon him, and in their stead he is now the recipient, to state it mildly, of their cordial diseateem.

Trustee Spinney's political conduct may not be calculated in all respects to excite the wild enthusiasm of those who samire directness of method and inflexible adherence to the straight and nurrow way, but it cannot be desied that a comparison of his conduct with that of the people who secured for him the distinguished honor of an election as mayor, and who are now engaged in villifying him because they did not succeed to using him as the head, and trout of their political machine, is very much in his favor. No halo, like that worn hy Mr. Cheveland, is visible about his devoted head, but the comparison compels the opinion that Joseph is extensely reputable.

A Lost Opportunity.

The warlike untions of the earth have The warlike nations of the earth have lost an opportunity for purchasing artillery cheap. A 2000-pound cannon (not a 2 00 nounder), formerly the property of Benjamin F. Woodworth, had been exposed for sale in front of a dealer's place of business for months without a myer till finally the dealer accepted an offer of \$10 for it. It is said that the purchaser immediately resold the piece of ordance to Colonel Theo C. Marcesu at an advance of 250 per cent. At any rate the cannon now stands guard in Colonel Marcesun's front yord, and "gapes hollow trues" down M. street.

KINGS RIVER CANYON AND 178 WATERS.

Sport for the Dusty and Thirsty People of the Summer Plains.

Epron Republican :-- That's it, boys! File on the logs! For this belongs to File on the logs! For this belongs to Encle Sam, and he don't care for wood, you know. Now, as we lie here and enov this great camptire, and rest-yes ast for that last climb was a terror we will have trout for supper, sure, and you will get outside of about ten of them. How will we catch them? Why, I thought everybody know how to angle for trout, but a few years ago I was in Kings river canyon and there was a party of six camped near us. We had trout for dinner and their guide came over to have a talk with us.

"Well," said he, "I see you have trout for dinner. Our fellows don't know how to calch them."

"But don't you know how?"

"No, sir. I can supply the camp with yearison, know all the mountains trails hereabouts, but I don't know how to fish." them. How will we eaten them? Why

Or field."

After dinner we wont over to thoir camp. It was on the river bank just above where Rooting river empties into Kings river. It was no wonder they did not eatch trout for they had files that would have puzzled a pike. (Eax Lucius.) I pulled a thread from the grey coat of one of the boys and wrapped one of the files after cutting away part of the large scarlet body and trimming the wings. I risged up a cast and with a willow rod that was comething less than a supling, I caught several troof. It was fun to see the look of amazement on their faces. We rigged them out complete and gave them a few lossons in easting, and where to east. Consequently that evening they had all the trout the camp could get away with. You know the troot on this coast is not like the Eastern troot excited the "speekled beauty." His name is Salmo Fiolanalia, while our troot is Salmo Fiolanalia, while our troot is Salmo Fieldes, Salmo Fontanalia; grows quite large in the Rangely Lakes, as our ridea does in Lake Taboe.

Of course, the most sportsmanliko way to bring them to reed is with hight tackle and artificial likes, but through the summer months the harves of the salmon fly is the most killing hat. If you would have real good sport on your trip take along a light trout rod, five to eight onnee, a twenty-five year red, and very light silk or braided linon line; in your fly book two or three dozen brown lackle, one dozen white moth, and two or three dozen brown lackle, one dozen white moth, and two will have a job of mending on hands. Thear you will sometimes need in peculiar places, and they sre sometimes Ribing in shaded places, or just at twitight.

Now, suppass you a londer (and three feet back of it as white moth, and two or three dozen how and they are not alless of the proven line, and your cast is ready. Not live a pole of mending on hands. Thear your will have a job of mending on hands.

That's right, now it is jointed, fusten your live and the seed on the same and the seed of the same heavy or the summer of the same an

a dowry of not less than \$250,000. When the desired mate is obtained, all one's needs are apparently satisfied, judging from this advertisement for a purchaser for "a well trained monkey, a talkative parrot and a beautiful sympathetic ear," which tolology to a lady, who, owing to her approaching marriage, has no further use for thou.

The most amusing of the advertisements quoted by our contemporary is, however, that of the very firsh peruquir, who makes wigs for "mon of turbleet, philosophers, scholars and politicisms, whose severe mental infor in the cause of humanity has difled their brains with genial ideas, while depriving their heads of their mitural capillary envelopes." These "artistically finished wigs," the advertiser continues, "while extremely useful and highly or maneutal to the weaver, are guaranteed absolutely invisible to the speciator. They can be seen any day in my private showrooms." DINNER SETS COMPLETE Directed Selection 1.10

In the Superfor court of the country of Fresno, state of California, the cotace of Elizabeth F. Chusingham, deceased, T. Datod Fresno, Cal., Juny 91, 1831, Juny T. Zacculur of the last will and testamentated decrease of attacents of Caunigham, deceased E. M. Johnston, attornoy for excenter. committed to the Whittior reform school by Gity Recorder Clark. The authorities at Whittier refused to accept the commitment, they maintaining that superior judges only can commitment they maintaining that superior and Dietrict Attorney Snow took a different view of the matter at first, but upon further investigation they have found the Whittier authorities to be correct. At the last legislature's law was pussed giving only the superior judges the power to commit to reform schools. This was not known in Fresno, as the official report of the laws passed by the legislature has not been printed and distributed as yet.
